Half-Day Workshop Details and Agenda

Collaboration and Support: Addressing the Intersection of BIT, Conduct, and Disability Support

Description:
Given the shared goals of student development, access, support, accountability, and community safety, it is not surprising that behavioral intervention teams (BITs), student conduct, and disability support often address overlapping concerns. This overlap emphasizes the need for discussion and planning on how these areas intersect, especially regarding student behavior and conduct, hospitalizations, and returning from a leave of absence. This workshop will assist institutions in developing approaches that align with best practices and provide adequate support to students.

Learning Outcomes:
After completing this training, participants will be able to…

- Understand the intersection of BIT, student conduct, and disability support
- Identify appropriate practices as it relates to supporting students whose disability related behavior violates the code of conduct and/or presents risk to themselves or others
- Develop appropriate practices for students experiencing a behavioral health hospitalization
- Distinguish return to campus practices after voluntary/involuntary leave

Agenda
10:00 AM – 2:00 PM

Overview
- Role of each office/department
- Overlaps between BIT, student conduct, and disability support
- Responding to behavior impacted by disability

Returning to Campus After a Hospitalization
- Disability considerations
- Case law examples
- Appropriate practices

Returning to Campus After a Leave of Absence
- Voluntary leave of absence
• Involuntary leave of absence

Who Should Attend:
• BIT Members
• Dean of Students
• Counselors/Clinical Providers
• Non-Clinical Case Managers
• Student Conduct Professionals
• Disability Support Services/ADA/Section 504 Compliance and Risk Management Professionals
