

NaBITA Professional Development Series: BIT Operations

Engaging in ongoing professional development is an important practice for any practitioner. For those serving on the BIT, it is important to seek out professional development opportunities on best practices in the field and to be well-trained on the functional operations of a BIT. We have developed “BIT in a Box,” a comprehensive guide for implementing, developing, and enhancing a BIT/CARE team. BIT in a Box is particularly useful for new teams but can also aid teams seeking to better formalize their current informal process. To help administrators streamline their BIT processes, BIT in a Box also includes over 25 templates and sample forms and resources, allowing administrators to have pre-made, ready to go, BIT/CARE team forms.

BIT in a Box is written and structured for the practitioner with the hope that it is user friendly, easy to digest, and most importantly applicable. This professional development series consists of 7 modules designed to enhance your professional knowledge on BIT operations. Areas of focus include overarching best practices, the 3 phases of a BIT (data gathering, risk assessment, interventions), team leadership and membership, and record-keeping. This professional development series has grouped a mix of NaBITA’s resources including, research articles, tip sheets, demonstration videos, webinars, whitepapers, etc., so that you can quickly and easily access what you need to enhance your BIT knowledge.
